#### 10. INSPECT MAGNETIC CLUTCH CLEARANCE

- Set the dial indicator to the magnet clutch hub. (a)
- Connect the battery positive lead to the terminal 3 of mag-(b) net clutch connector and the negative lead to the earth wire. Turn on and off the magnet clutch and measure the clearance.

### Standard clearance:

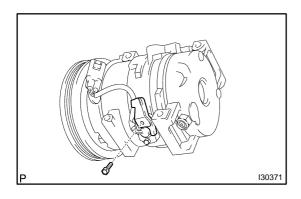

0.35 - 0.60 mm (0.014 - 0.024 in.)

If the measured value is out of the standard range, remove the magnet clutch hub and adjust it with magnet clutch washers.

#### NOTICE:

Adjustment shall be performed with 3 or less magnet clutch washers.

- Remove the compressor and magnetic clutch from the (c)
- Install the bolt and bracket. (d)

#### **INSPECT COMPRESSOR OIL** 11.

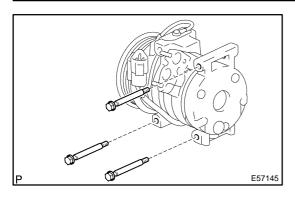

When replacing the compressor and magnetic clutch with new one, after gradually removing the refrig-(a) erant gas from the service valve, drain the following amount of oil from the new compressor and magnetic clutch before installation.

#### Standard:

(Oil capacity inside new compressor and magnetic clutch: 120 + 15 cc (4.1 + 0.51 fl.oz.)) - (Remaining oil amount in the removed compressor and magnetic clutch) = (Oil amount to be removed when replacing)

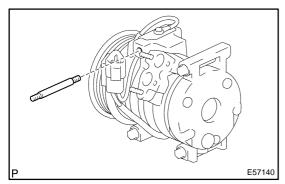

### NOTICE:

- When checking the compressor oil level, observe the precautions on the cooler removal/instal-
- Because compressor oil remains in the pipes of the vehicle, if a new compressor and magnetic clutch is installed without removing some oil inside, the oil amount becomes too much, preventing heat exchange in the refrigerant cycle and causing refrigerant failure.
- If the remaining oil in the removed compressor and magnetic clutch is too small in volume, check for oil leakage.
- Be sure to use ND-OIL8 for compressor oil.

# 12. TEMPORARILY TIGHTEN COMPRESSOR AND MAGNETIC CLUTCH

(a) Temporarily the compressor and magnetic clutch with the 3 bolts.

# 13. FULLY TIGHTEN COMPRESSOR AND MAGNETIC CLUTCH

(a) Using a torque socket wrench (E8), install the bolt.

Torque: 25 N·m (250 kgf·cm, 18 ft·lbf)

(b) Tighten the compressor and magnetic clutch with the 3 bolts and nut.

Torque: 25 N·m (250 kgf·cm, 18 ft·lbf)

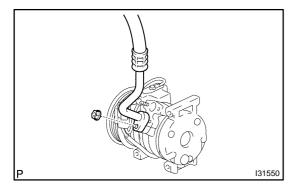

(c) Connect the connector.

#### NOTICE:

Tighten the bolts and nuts in following order shown in the illustration to install the compressor magnetic clutch.
